DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on May 29, 2009 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, and 3-5 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No.

Art Unit: 1796

7,393,965. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matters of both sets of claims substantially overlapping with each other.

Claim Rejections - 35 USC § 103

4. Claims 1 and 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al. (US 6,207,774) alone or in view of Nakanaga et al. (JP 05-320248) for the same rationale as set forth in the previous Office Action mailed .

Response to Arguments

5. Applicant's arguments filed April 29, 2009 have been fully considered but they are not persuasive.

Applicants' attempt of showing of criticality and unexpected results of metallocene complex (I) with both R¹³ and R¹⁴ as p-tolyls being superior compared to metallocene complex (I) with both R¹³ and R¹⁴ as phenyls is noted. However, such a showing does not make any sense since the limitations of R¹³ and R¹⁴ of complex (I) of the instant claims include phenyl groups.

Since the Applicants have not indicated any errors in the rejection under 35 U.S.C. 103(a) of the record nor there is any showing of criticality and unexpected results of the instant claims over the teaching of the cited prior art, the rejection under 35 U.S.C. 103(a) of the record is still deemed proper and thus maintained.
